DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 22, 26 drawn to a process of detecting radiation.

Group II, claim(s) 2, 5-9, 12-16, 18-21 drawn to a fluid analyzer.

Group III, claim(s) 4, 5, drawn to a fluid analyzer using a thermometer.

Group IV, claim(s) 30-33, 37-45, 47, 51, 54, 57, and 58 drawn to a fluid analyzer using a timing device.

The inventions listed as Groups I, II, III, and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Invention I relates to the detection of radiation from a fluid, but does not specifically employ an activation source, temperature sensor or a timing device. Invention II is a fluid analyzer system, and utilizes a detector coupled with an amplifier, and a light controlled chamber, and an activator. Invention III is a fluid analyzer that utilizes a temperature sensor and a timer. Invention IV is a fluid analyzer that utilizes a temperature sensor. Invention III is distinct from inventions I, II and IV because it requires a timing device, while the others do not. Invention IV is distinct from inventions I and II because invention IV requires a

temperature sensor and inventions I and II do not. Invention II is distinct from invention I because invention II requires a signal magnifier, and invention I does not.
